ITSM10DMT	10mm Depth Marking Tool	\$12.10
ITSM12DMT	12mm Depth Marking Tool	\$12.10

DEPTH MARKING TOOL INSTRUCTIONS

- ▶ Insert tubing that has been cleanly cut and deburred into the opening of the Depth Marking Tool until the tubing is bottomed out against the shoulder of the tool.
- ▶ Using a felt tip permanent marker mark the tubing at the top of the Depth Marking Tool.
- ▶ Remove the tubing from the Depth Marking Tool. Insert it into the tube fitting until it bottoms out against the shoulder of the tube fitting.
- ▶ Rotate the fitting nut until it is finger tight. If the mark on the tubing can be seen above the nut the tubing is not fully inserted into the fitting.
